SUMMARY

Dynamic Front End Developer with a proven track record at Sip - Fintech, specializing in Angular and API integration. Adept at creating reusable components and enhancing user experiences. Strong problem-solving skills complemented by expertise in JavaScript and TypeScript, driving impactful solutions in fast-paced environments.

SKILLS

HTML and CSS, TypeScript, Angular, Astro, React, Next.js, Java, C#, NestJS, MySQL and SQL Server, MongoDB, DBeaver, Git, Postman, AWS DynamoDB, Azure and AWS

EXPERIENCE

Front End Developer, Sip - Fintech , February 2025-Current
Lima, Perú

- Developed and maintained enterprise applications using Angular, participating in the frontend technological evolution from Angular 11 to Angular 20.
- Integrated REST APIs and external services, ensuring efficient communication between frontend and backend.
- Implemented responsive interfaces using SCSS, Angular Material, and BEM methodology, building modular and reusable style systems.
- Designed scalable frontend architectures through reusable components, shared modules, lazy loading, guards, and interceptors, improving application maintainability and performance.
- Integrated WordPress and Advanced Custom Fields (ACF) for dynamic content management from CMS platforms.
- Integrated Google Tag Manager (GTM) for event tracking, behavior analysis, and conversion measurement.
- Participated in Angular migration and upgrade processes, ensuring compatibility, technical debt reduction, and adoption of new framework capabilities, including Standalone Components, Signals, and new control flow structures.
- Monitored deployments and incident resolution in Azure environments, collaborating in the identification and mitigation of security vulnerabilities.

Full Stack Developer, Tranzferme, September 2024-January 2025
Lima, Perú

- Enhanced Tranzferme's system by developing backend and frontend solutions.
- Created microservices using NestJS 8 to improve application performance.
- Maintained platform for international transfers utilizing serverless architecture.
- Developed user interfaces with Angular 14 to enhance user experience.
- Deployed services on AWS for scalable infrastructure.
- Implemented SCRUM methodology to streamline project management processes.

EDUCATION

Bachelor of Science
Computer Science, Cibertec, Lima July 2025

- Ranked in Top 10% of class
